The following information on towability of vehicles is reprinted with the permission of MotorHome® Magazine, and is believed to be reliable. However, Demco does not warrant the information to be correct. It is republished as a service to our customers. Always consult your towed vehicle owner's manual and follow towing instructions. Each year, MotorHome® Magazine, compiles a list of vehicles that can be towed four-down behind a motor home with no modifications required. This guide contains only those vehicles that have been approved by their manufacturers for towing.

**⚠ Caution:** MotorHome® Magazine left out any vehicles that have towing speed limits slower than 55 m.p.h., or distance limits of less than 200 miles. At a minimum, these vehicles require significant modification, such as the use of an aftermarket product, to make them towable. The availability of a Demco Tow Bar Base Plate does not imply that these vehicles can be modified or that there is an aftermarket product available. Refer to your vehicle owner's manual or consult your dealer to determine whether your vehicle can be modified to make it towable. Failure to observe this precaution could result in property damage or personal injury.

A "Yes" in the column under the type of transmission (auto or manual) means that when equipped with that type of transmission, the vehicle is towable; "No" means it is not towable. If the model is not available with a particular transmission, "N/A" appears in the column. The "Approximate Curb Weight" and "Total Length" figures are for a vehicle's base model. Keep in mind also that although some vehicles are indicated as being towable, not all trim lines, engine configurations, etc. within that model line may be towable; always refer to the particular vehicle's owners manual to be sure.

#### BUICK

Model	Transmission		Drive Configuration	Speed /Distance Limits	Approximate Curb Weight	Total Length
	Auto	Manual				
Enclave C X, C XL	Yes	N/A	All-wheel drive	65 mph/None	4,985 lbs.	201.5 in.
